

RUDD

INDUSTRIAL

SAFETY & PPE

Family owned, Western Australian Business

ABOUT US

We are a family owned business that provides industrial supplies to many of the top engineering, manufacturing, mining, transport, construction and agricultural companies in Western Australia. We are renowned for our support to product sales, providing exceptional service, extended customer support and a comprehensively stocked product range.

The working directors and CFO adopt a hands on approach and together with their Department Managers maintain a daily overview of all operations. Our philosophy that “the success and growth of your business is essential for ours” ensures that focus is placed on providing the most efficient solutions for you, our customer.

Our service is second to none in the industry and the stability of our core staff enables us to grow without impacting our existing high levels of service. A strong work ethic, passion and commitment to high standards is instilled in all Rudd employees who work tirelessly to meet job requirements, not hours on the clock.

WHY CHOOSE US

At Rudd Industrial, we pride ourselves on being competitive, faster and more accurate than any other supplier. With management “at the front” on a daily basis, we are proactive in ensuring your demands are met and your expectations exceeded. The success of your business is as important to us as it is to you.

Western Australian owned and operated, we understand the WA industry and strive to support local businesses and families, providing quality, local products where possible.

We provide professional and timely responses to all requests and enquiries. Consider the Rudd team an extension of your workforce.

With access to a vast range of suppliers, our experienced sales staff can source an unlimited selection of products, reducing the workload of your own purchasing officers.

We stock a comprehensive range of products at competitive prices, reducing your suppliers and improving your efficiency.

We have all your industrial and workshop supplies at one location.

With convenient locations for pickup and an efficient warehouse delivery system, you will get your goods on time, every time.

WELDING SAFETY

3M™ Speedglas™ G5-02 Curved Auto-Darkening Welding Helmet

- World's first curved auto-darkening lens!
- A massive 76 x 150mm viewing area
- 100% wider field of view than a traditional flat lens
- True-View technology with an extra-light shade of 2.5
- Dark shades 8-12
- Four photo sensors with industry-leading arc detection (> 1 Amp)
- Slim, lightweight profile (just 535g)
- Bluetooth connectivity

Part No 621120

Speedglas™

3M™ Speedglas™ G5-01VC Welding Helmet with Heavy-Duty Adflo™ PAPR

- Flip-up mechanism reveals 15% larger high impact grinding visor
- True-View optics and variable dark state colours
- Extra-large 73 x 109mm viewing area
- Extra dark shade 14 for heavy-duty welding (3/5, 8-14)
- Control the airflow in your helmet with climate control
- Removable welding shield reduces weight by 35%
- Bluetooth connectivity and optional task light
- Heavy-duty Adflo for 12 hours' protection (RMPF = 50)

Part No 617830

3M™ Speedglas™ 9100XXi FX Air Welding Helmet with Adflo™ PAPR

- Flip-up mechanism reveals clear high impact grinding visor
- True-View optics for improved colour and contrast
- Extra-large 73 x 107mm viewing area with SideWindows
- Industry-leading arc detection (> 1 Amp)
- Adflo PAPR provides 50 times cleaner air (RMPF = 50)
- 8 hours powerful respiratory protection
- Available with 12 hour heavy-duty battery (Part No 547726HD)

Part No 547726

3M™ Speedglas™ 9100XXi Air Welding Helmet with Adflo™ PAPR

- External button for grind and memory modes
- True-View optics for improved colour and contrast
- Extra-large 73 x 107mm viewing area with SideWindows
- Industry-leading arc detection (> 1 Amp)
- Adflo PAPR provides 50 times cleaner air (RMPF = 50)
- 8 hours powerful respiratory protection
- Available with 12 hour heavy-duty battery (Part No 507726HD)

Part No 507726

3M™ Speedglas™ 9100XXi FX Welding Helmet

- Flip-up mechanism reveals clear grinding visor
- Extra-large 73 x 107mm viewing area with SideWindows
- True-View optics for improved colour and contrast
- Industry-leading arc detection (> 1 Amp)
- Highest possible optical classification (1/1/1)
- Exhaust vents remove exhaled air

Part No 541826

3M™ Speedglas™ 9100XXi Welding Helmet

- Flip-up mechanism reveals clear grinding visor
- Extra-large 73 x 107mm viewing area with SideWindows
- True-View optics for improved colour and contrast
- Industry-leading arc detection (> 1 Amp)
- Highest possible optical classification (1/1/1)
- Exhaust vents remove exhaled air

Part No 501826

Part No 401385

3M™ Speedglas™ 9002NC Welding Helmet

- Large 55 x 107mm viewing area
- True-View optics for improved colour and contrast
- Slim, super light, low profile helmet - just 485 grams
- Industry-leading arc detection (> 1 Amp)
- Shade range 3/8-12
- Aerodynamic exhaust vents remove exhaled air

3M™ Speedglas™ 100V Welding Helmets

- 44 x 93mm viewing area
- New smooth ratchet head harness
- New delay setting (set your dark to light return time)
- TST (TIG Sensor Technology) reacts down to 10 amps
- 6 unique graphic options

PRO CHOICE

MAXI MASK 2000 HALF MASK - CHEMICAL MULTI GAS KIT

- Protects against a wide range of chemicals including organic vapour, acid gas, sulphur & ammonia
- Durable thermoplastic rubber mask for superior fit and able to be worn under most helmets
- Twin filter design provides a balanced fit, lower breathing resistance & improves field of vision
- Kit includes: 1 x mask, 2 x ABEK1 filters with resealable bag for hygienic storage

Types of respiratory protection equipment (RPE) from 3M.

There are three main types of RPE available from 3M:

Filtering Facepiece/Disposable Respirators

- Ideal for most industries and applications where wearers require particulate protection e.g. dusts and mists
- A choice of cup-shape or flat-fold, valved or unvalved and also the option to protect against ozone and nuisance* levels of organic vapours and acid gases
- Lightweight and maintenance free
- Comfortable, convenient and easy to use

Reusable Half and Full Facepiece Respirators

- Offer protection against particulates, gases and vapours and combinations of the two
- These respirators have integrated or replaceable filters and parts. They may be cleaned, stored and reused provided they are in good condition
- Full facepiece respirators also offer integrated eye and face protection
- Many models are fully maintainable

Powered Air & Supplied Air Systems

- Offer protection against dusts, mists, fumes, gases, vapours and combination hazards e.g. paint spray
- Can offer integrated eye, face, head, neck and hearing protection in one system avoiding incompatibility issues between items of PPE
- Modular system allows you to mix and match parts as your environment or application changes, giving you the ultimate in flexibility and ease of use
- No increase in breathing resistance means more comfortable and longer wear time
- Usable by a wide range of users regardless of facial characteristics; shape, size etc.

* Nuisance levels are those levels below the Safe Work Australia Exposure Standards.

Filtering Facepiece/Disposable Respirators

Comfort Series 9300A+ Aura™ Particulate Respirators

The 3M™ Aura™ Filtering Facepiece/Disposable Respirators 9300+ are the result of 3M's continuous drive to improve comfort. They are packed with ground-breaking ideas, technologies and materials and have also retained many of the features that helped make the original 9300 series hugely popular. Features include low breathing resistance filter technology for easier breathing throughout your shift, an embossed top panel to reduce fogging of eyewear, a sculpted edge for improved compatibility with eyewear and a chin tab to improve ease of fitting.

Features and Benefits:

Low breathing resistance

- Combines the benefits of 3M's electret particulate filter material with advanced low breathing resistance filter technology
- Gives effective filter performance whilst lowering resistance to breathing
- Improved breathing ease and comfort

3M™ Cool Flow™ valve

- Helps release warm and moist exhaled breath from inside the respirator
- Suitable for physically demanding environments
- Offers easy exhalation

Convenience

- Flat-folded: easy to store when not in use
- Hygienic individual packaging helps protect the respirator from contamination before use
- Innovative chin tab improves ease of donning and adjustment to help achieve a comfortable fit

Clear vision

- Embossed top panel helps reduce fogging of eyewear

Sculpted nose panel

- Adjustable noseclip helps provide a custom secure seal
- Curved low profile design conforms well to nose and eye contours, allowing more room for eyewear
- Helps provide a good field of vision
- Improves compatibility with eyewear

Face and head comfort

- Ingenious 3-panel design fits a wide range of face shapes and sizes
- Accommodates your facial movements
- Collapse resistant; ideal for work in hot, humid environments
- Stays securely in place, helping to provide a good, comfortable seal
- Large water/sweat absorbent nose foam material is soft on the skin
- Smooth inner cover web helps to create a comfortable environment for the face

- Smooth tapered shape for easy insertion into the ear canal
- Cord allows earplugs to hang around neck when not in use
- Pairs packaged in individual poly bags
- Qty/Box: 100 corded pairs

EPYU PRO CHOICE

PROBELL DISPOSABLE UNCORDED EARPLUGS

- Class 5, SLC₈₀, 27dB
- Hearing protection for noise levels to 110dB(A)
- ProPlug Bell shape delivers maximum comfort
- Superior design makes it easier to insert & reduces tendency to back out of the ear
- Pairs packaged in individual poly bags
- Qty/Box: 200 uncorded pairs

EMVIP PRO CHOICE

VIPER EARMUFFS

- Class 5, SLC₈₀, 26dB
- Hearing protection for noise levels to 110dB(A)
- Solid, lightweight ear cup construction
- Inner foam & headband cushions provides comfort during extended wear
- Low clamping force applies minimum pressure while maintaining a tight, snug seal

EMPYTS PRO CHOICE

PYTHON SLIMLINE EARMUFFS

- Class 5, SLC₈₀, 31dB
- Hearing protection for noise levels to 116dB(A)
- High performance & strong durability through steel wire construction for maximum protection with easy adjustment system for individual fit
- Solid, lightweight ear cup construction
- Low clamping force for comfort

EMPYT-NB PRO CHOICE

PYTHON SLIMLINE NECKBAND EARMUFFS

- Class 5, SLC₈₀, 23dB
- Hearing protection for noise levels to 108dB(A)
- Comfortable neckband configuration for extended wear
- Contemporary low profile design that withstands abuse without compromising comfort
- High quality ear cushions, balanced clamping force for comfort

HHEM PRO CHOICE

VIPER HARD HAT EARMUFFS

- Class 5, SLC₈₀, 26dB
- Hearing protection for noise levels to 110dB(A)
- Fits a wide range of hard hats
- Solid, lightweight ear cup construction
- Low clamping force applies minimum pressure while maintaining a tight, snug seal
- High quality ear cushions

HHEMPYTS PRO CHOICE

PYTHON SLIMLINE HARD HAT EARMUFFS

- Class 5, SLC₈₀, 31dB
- Hearing protection for noise levels to 116dB(A)
- Fits a wide range of hard hats
- Contemporary low profile design that withstands abuse without compromising comfort
- Solid, lightweight ear cup construction
- High quality ear cushions

Earmuffs

3M™ Peltor™ X4 Series Earmuffs

Extremely lightweight, low-profile earmuffs for use in high-noise exposure situations.

Historically higher attenuating earmuffs meant larger and bulky cups, but no longer. The 3M™ PELTOR™ Earmuffs X4 can attenuate by as much as 31dB whilst maintaining a sleek, low profile aesthetically pleasing design. Using the same innovative technology, the 3M™ PELTOR™ X5 remains relatively lightweight with excellent balance and wearer comfort despite the larger cups, providing ratings as high as SLC80 35dB.

Features and Benefits:

Comfort

- Easy to adjust headband
- Comes in electrically insulated (dielectric) and wire formats
- Twin headband design helps reduce heat build-up and provides a good fit and balance
- Earcups tilt for optimum comfort and efficiency

Protection

- Unique attenuation as a result of optimum combination of specially-formulated foam featured in the earcups, cushions and the innovative spacer and cup design
- Newly designed spacer improves attenuation without excess bulk or weight
- Also available in helmet attached and neckband versions.

Design

- Extremely lightweight (234g)
- Integrated design for more robustness
- Colour-coded for ease of selection
- Easy to clean
- Extremely slim design providing excellent compatibility with other 3M personal protection products

Body Protection

3M™ Protective Coverall 4515

Low cost hazardous dust protection.

The 3M™ Protective Coverall 4515 is an economic solution to protect from hazardous dusts such as asbestos fibres exposed to during site inspection. While protecting on the outside, the breathable material allows air to escape from the inside to reduce heat build-up and discomfort. Available in white, blue and orange, the range is certified as CE Type 5/6 for both hazardous dusts and liquid splashes.

Features and Benefits:

- Excellent barrier against dry particles and limited liquid splash (CE Type 5/6)
- Meets inward leakage requirements of EN 1073-2 for protection against nuclear particles
- Robust, highly breathable 50gsm SMS material
- 2-way zipper with storm flap for added on-off convenience and extra protection
- Elastic cuffs, waist and ankles for a better fit and freedom of movement
- Low-linting
- Available in white, blue and orange

Fabric material

The material used in the 3M protective coverall 4515 sandwiches a single thick filtering layer of melt-blown polypropylene between two thinner layers of softer spun bond polypropylene delivering a finished durable, breathable 50gsm protective material that aids air flow to reduce heat stress and improve comfort.

Seam Technology

Seams are serged for Type 5/6 protection.

Body Protection

3M™ Protective Coverall 4510

The 3M™ Protective Coverall 4510 is an economic solution which offers quality and protection from limited chemical splashes such as those from paint spraying and is certified as CE Type 5/6 protection standard. The material is microporous, allowing air and moisture to escape from within the suit, while helping to protect from the hazard on the outside.

Features and Benefits:

- Excellent barrier against dry particles and certain limited liquid chemical splash (CE Type 5/6)
- Laminated microporous material
- 2-way zipper with storm flap for added on-off convenience and extra protection
- Elastic cuffs, waist and ankles for a better fit and freedom of movement
- Super low-linting
- Anti-static treatment to EN 1149 to reduce charge build up (on inner surface)
- Meets inward leakage requirements of EN 1073-2 for protection against nuclear particles
- Biological protection tested to EN 14126

Fabric material

The anti-static treated 3M protective coverall 4510 material is made using a layer of soft, spunbond polypropylene and a layer of light, but high quality anti-static treated polyethylene laminate film giving good levels of barrier efficiency and protection.

Seam Technology

Seams are serged for Type 5/6 and certain seams bound for extra protection.

3M™ Protective Coverall 4532+ (AUS Only)

The 3M™ Protective Coverall 4532+ range is made from a highly breathable and lightweight 5 layered SSMMS material, providing the wearer with CE Type 5/6 protection with specialist treatments providing anti-static protection and an enhanced liquid repellency.

Features and Benefits:

- Specialist coatings enable this product to be used in many applications not usually suitable for SMS Based coveralls
- SSMMS material, see Fabric Material
- 3-panel elasticated hood for enhanced compatibility with complimentary PPE
- Knitted cuffs and elasticated waist and ankles
- 2-way zipper for added convenience and a storm flap with full sealable tape for extra protection
- Enhanced and reinforced triangular gusset panel to increase product durability
- Anti-static treatment to EN 1149 to reduce charge build up
- Meets inward leakage requirements of EN 1073-2 for protection against nuclear particles
- Low linting
- Available in blue (with a light blue triangle back panel) and Cool white

Fabric material

The 3M protective coverall 4532+ is made using a 52gsm SSMMS, which consists of two outer layers of spunbond polypropylene (SS) encasing two layers of melt-blown polypropylene (MM) and a third layer of spunbond (S) on the underside. The fabric has been specifically designed to be durable whilst enabling air flow thereby reducing heat stress and enhancing wearer comfort. The middle 2 layers act as a filter to effectively protect against noxious dust and splash whilst the outer layers offer strength and increased liquid hold out from the alcohol and oil repellence treatment.

Unique treatment encourages the oil to bead rather than soak through.

Seam Technology

Seams are serged for Type 5/6 and certain seams bound for extra protection.
